Perfect. We will make sure to get that over to you.

Thanks,

Amy

Absolutely. I'll draft a letter that will likely reach you on Monday describing the clarification on Tier 1 monitoring. I'll also revise the requirement for a sample of the wall (since there is going to be the Sheet Pile in it) and- if Ryan has the diagrams/math explaining how that one dredge to ~-12.5 feet will get to a known concentration above the RAL- I can revise that as well.

Becky,

If you wouldn't mind re-issuing the letter that would be extremely helpful on our end. I don't want anything, particularly as important as this, to get missed.

Thanks,
Amy

Amy

I am working with Erika on the revisions to the CWA 401 Memorandum for the BODR Addendum. In reviewing her documents and her comments, I realize that I mis-typed the Water Quality Monitoring requirements for the

Treated Barge Water associated with the cofferdam sediments. EPA's letter dated March 18, 2014 specified that the EPA will require the Tier 2 monitoring schedule, as defined in the Final Memo. It should state that the EPA will require the Tier 1 monitoring schedule. The EPA anticipates that the data collected during this sampling event will be used for informational purposes only.

I can submit a letter clarifying this typographical error if that is preferred.

Apologies for the error.

Becky
